May 2025 – Jul 2025

IIT Agartala

Agartala, Tripura

- Developed a hybrid **Decision Tree–Extreme Learning Machine (DT–ELM)** model for brain tumor classification under **Dr. Parijata Majumdar**.
- Applied **Salp Swarm Algorithm (SSA)** for feature selection and **Honey Badger Algorithm (HBA)** for hyperparameter optimization.

PROJECTS

AgentBench | *Python, Docker, Next.js, PostgreSQL, Bun* | [GitHub](#) | [Live](#)

Jul 2026 – Present

- Building a reliability-first AI agent benchmarking platform using isolated Docker environments for deterministic execution and reproducible evaluation.
- Implemented statistical reliability metrics, replay traces, benchmark analytics, and an interactive dashboard for comparing AI agents.

BlogSphere | *React, Express.js, MongoDB, Redux, Firebase* | [GitHub](#) | [Live](#)

Apr 2025

- Built a full-stack blogging platform with Google OAuth, JWT authentication, email verification, Cloudinary media uploads, and EditorJS-powered rich text editing.
- Implemented social features including likes, comments, followers, user profiles, and personalized feeds using Redux with an MVC-based Express + MongoDB backend.

Ocean | *Next.js, Prisma, Supabase, Nylas API* | [GitHub](#)

Jun 2025 – Jul 2025

- Built a scheduling platform integrating the Nylas Calendar API with Google/GitHub OAuth authentication and a Supabase PostgreSQL backend.
- Implemented dynamic booking forms, Zod validation, email workflows, and a responsive dashboard using Tailwind CSS and shadcn/ui.

NexaPost | *React, Express.js, MongoDB, Gemini AI* | [GitHub](#) | [Live](#)

Jun 2026 – July 2026

- Developed an AI-powered social media automation platform supporting LinkedIn, X, Facebook, and Instagram through OAuth integration.
- Integrated Gemini-powered content generation, automated scheduling with cron jobs, and activity tracking through a modern dashboard.
